Operating System Information

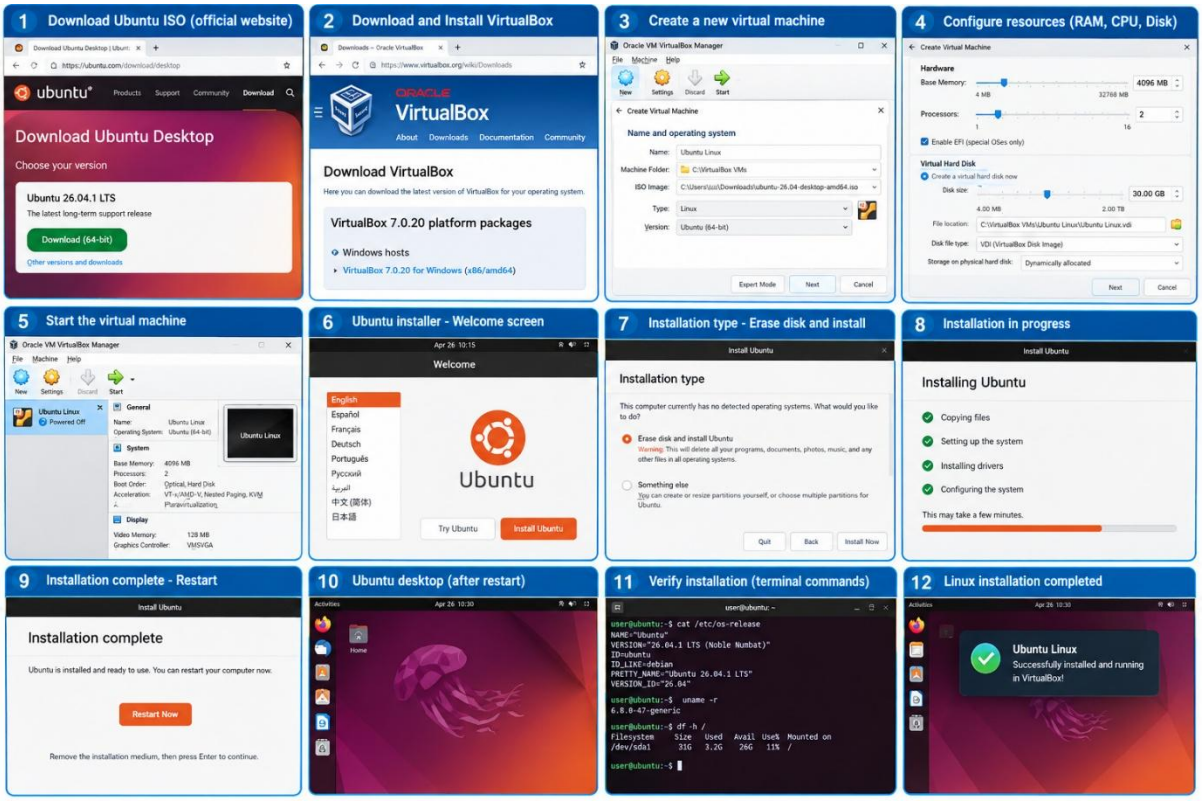

Task 1 : On your Windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

System Information of My Laptop

No.	Component	Details
1	Operating System	Windows 11 Home Single Language
2	OS Version	10.0.26300 (Build 26300)
3	Processor	11th Gen Intel Core i5-11400H @ 2.70 GHz
4	Installed RAM	24 GB
5	System Manufacturer	ASUS
6	System Model	ASUS TUF Gaming F15 FX506HC

Task 2 : Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or BalenaEtcher to create a bootable USB drive for installation.

To install the Ubuntu Linux operating system on a Windows computer using Oracle VirtualBox.

Procedure:

1. Downloaded the Ubuntu Linux ISO file from the official website.
2. Installed Oracle VirtualBox on Windows.
3. Created a new virtual machine named Ubuntu Linux.
4. Allocated RAM, CPU cores, and virtual hard disk space.
5. Mounted the Ubuntu ISO file and started the virtual machine.

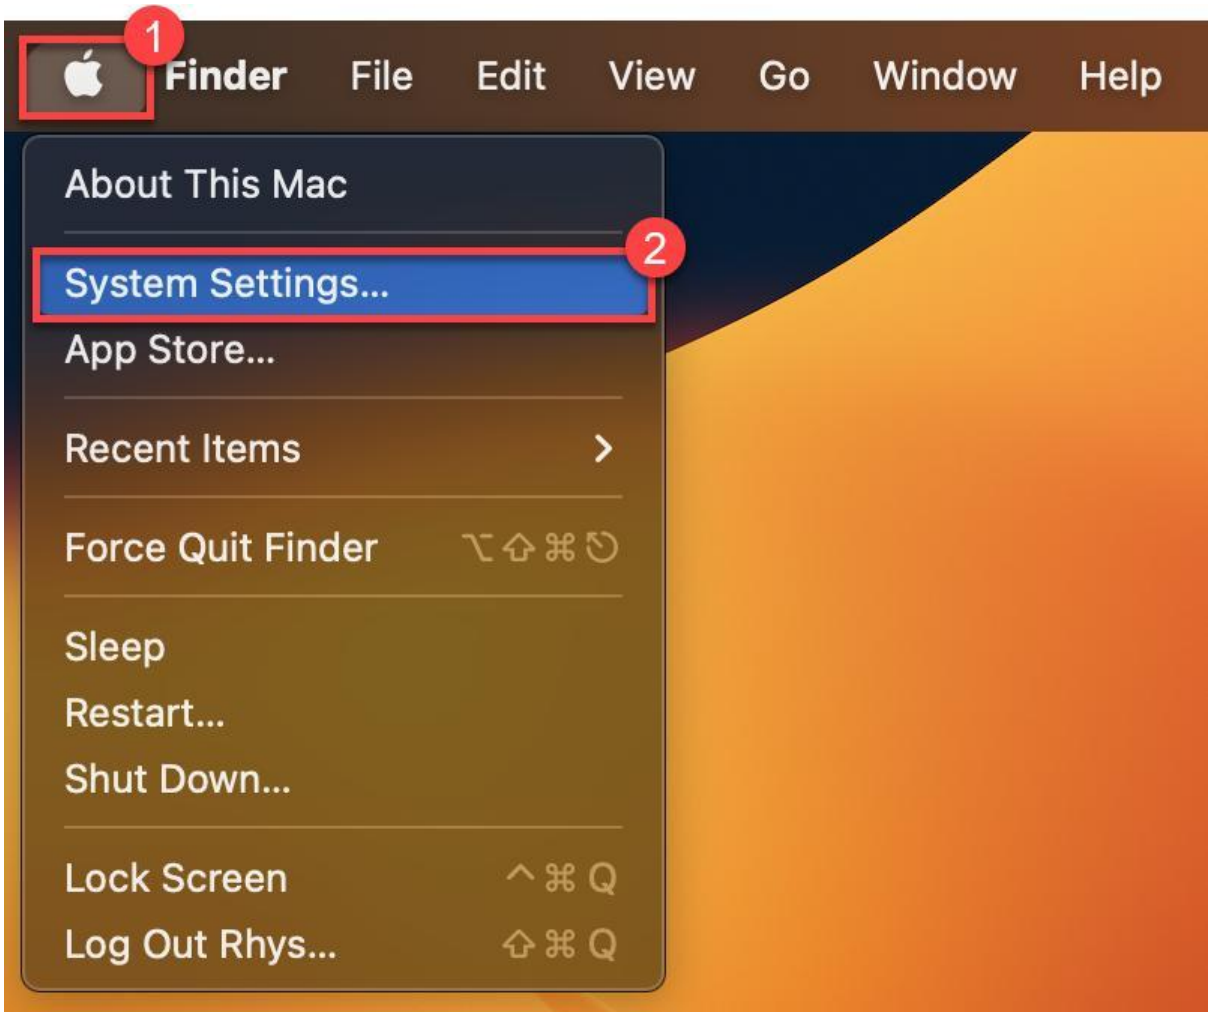

6. Followed the installation instructions to install Ubuntu.
7. Restarted the virtual machine and opened the Ubuntu desktop.
8. Verified the installation using Linux terminal commands.

Result: Ubuntu Linux was installed and successfully running in VirtualBox.

Task 3 : On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati.

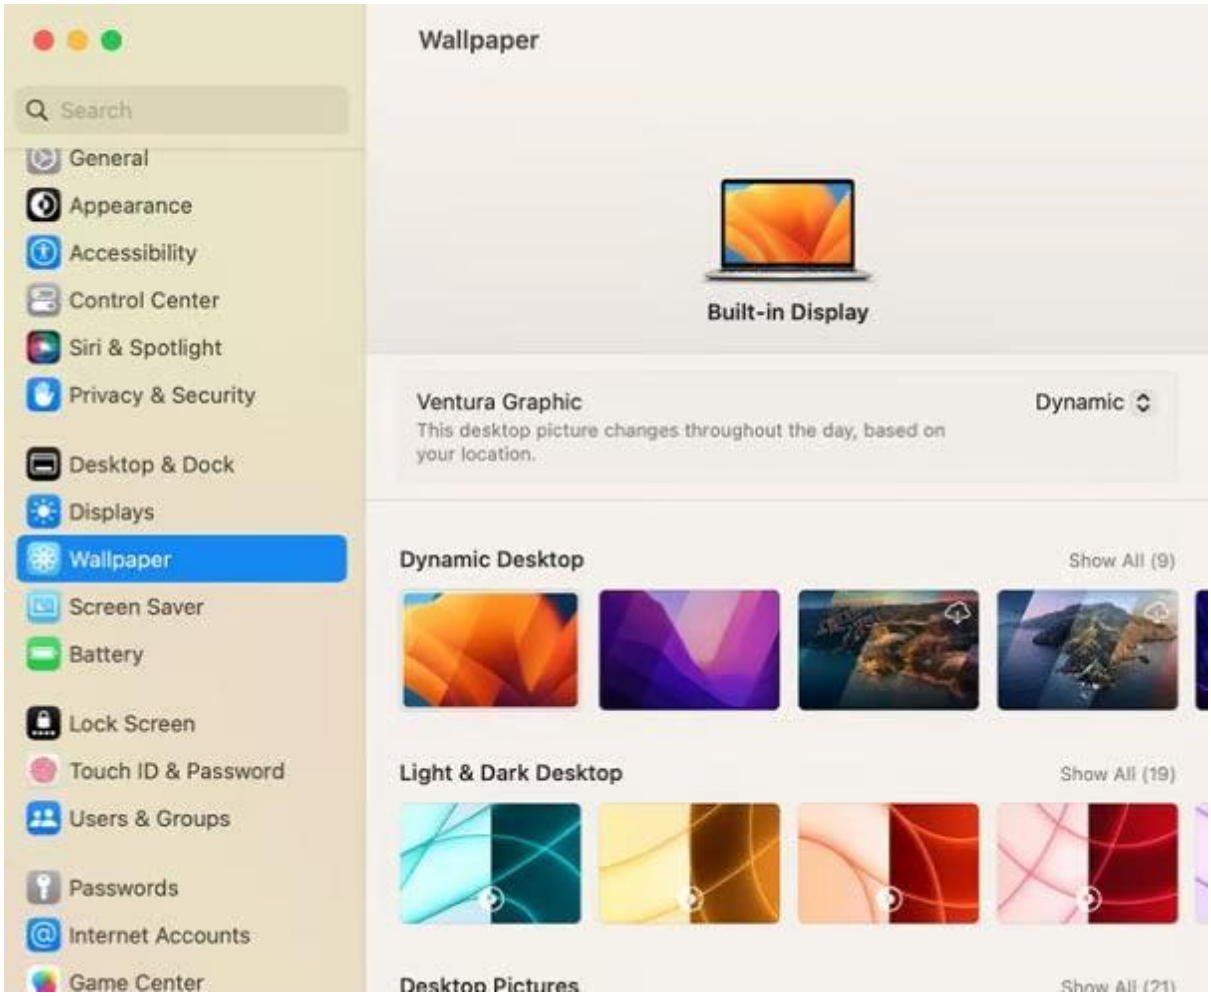

Step-by-Step Guide: Change Wallpaper and Language in macOS

Step 1: Open System Settings

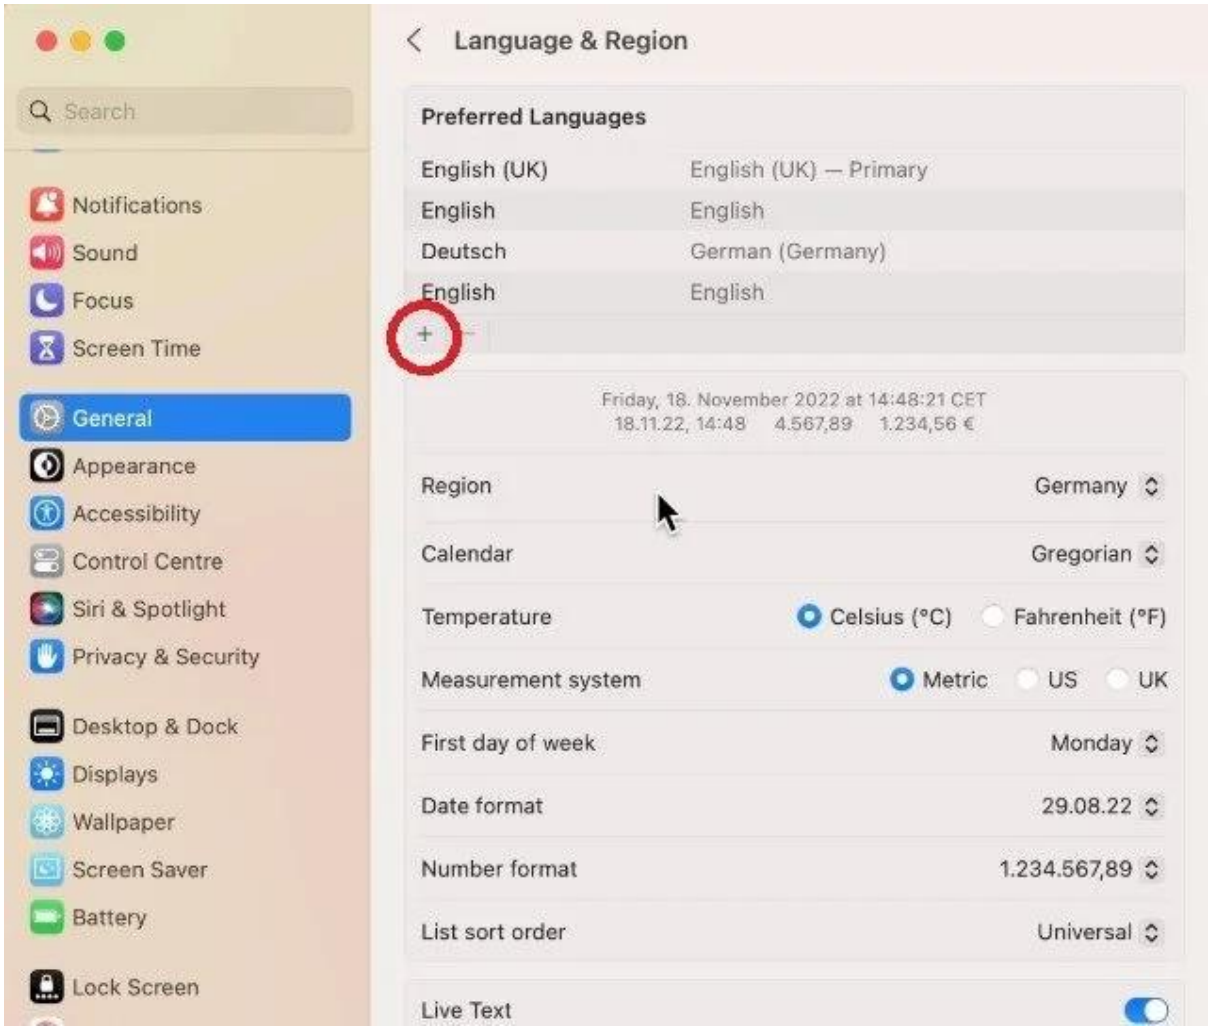

1. Start your Mac or macOS virtual machine.
2. Click the Apple menu (□) in the top-left corner.
3. Select System Settings or System Preferences, depending on your macOS version.

Step 2: Change the desktop wallpaper

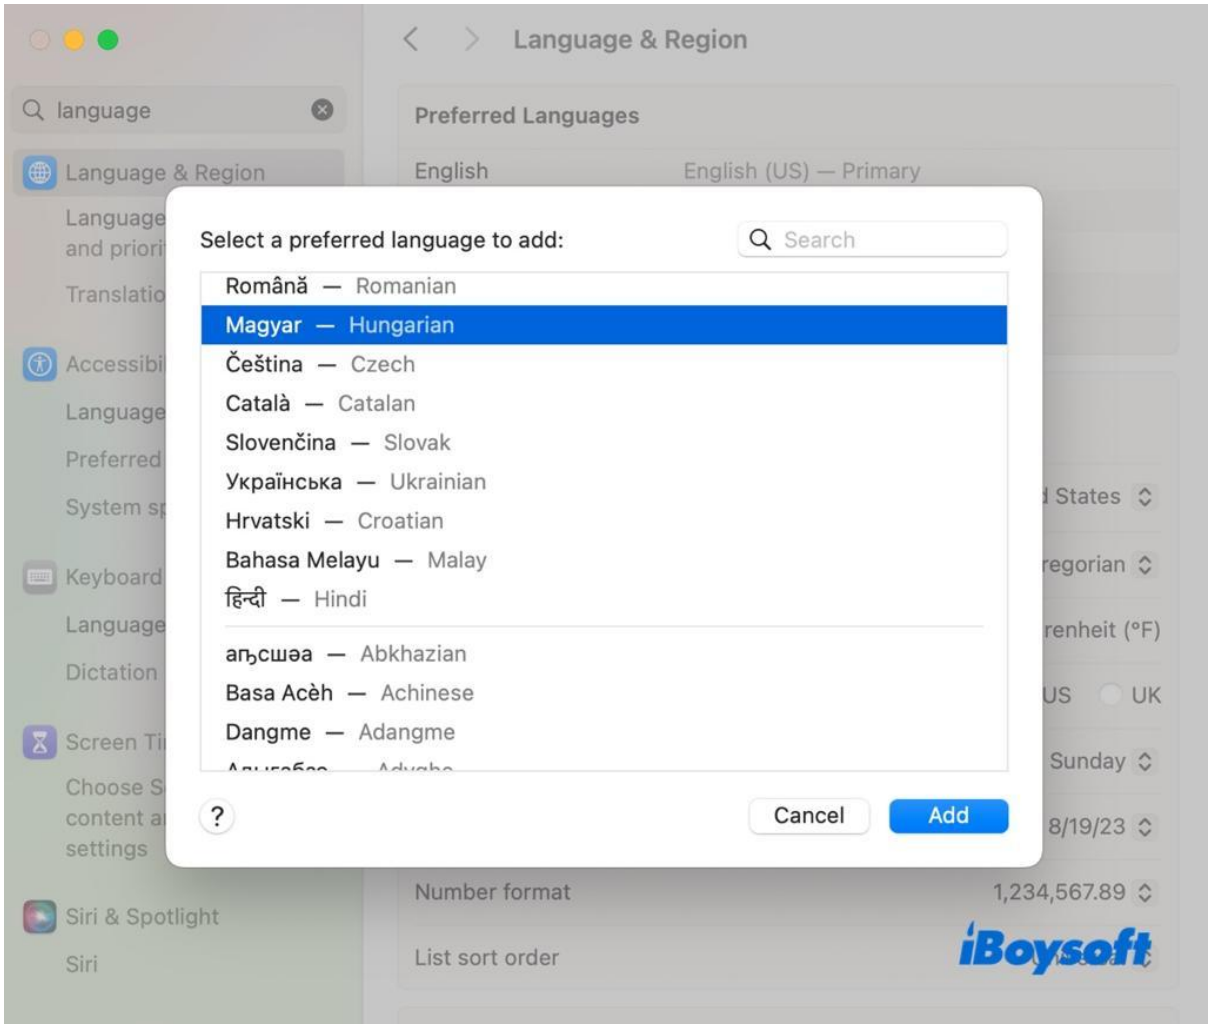

1. Select Wallpaper in the sidebar.
2. Browse the available desktop backgrounds.
3. Click a wallpaper you like.
4. Check that the desktop background has changed.

Step 3: Open Language & Region

1. Return to System Settings.
2. Click General.
3. Select Language & Region.

Step 4: Add Hindi or Gujarati

1. Under Preferred Languages, click the + (Add) button.
2. Search for Hindi or Gujarati.
3. Select your preferred language.
4. Click Add.
5. If macOS asks whether you want to use the new language as the primary language, choose the appropriate option to make it the main language.

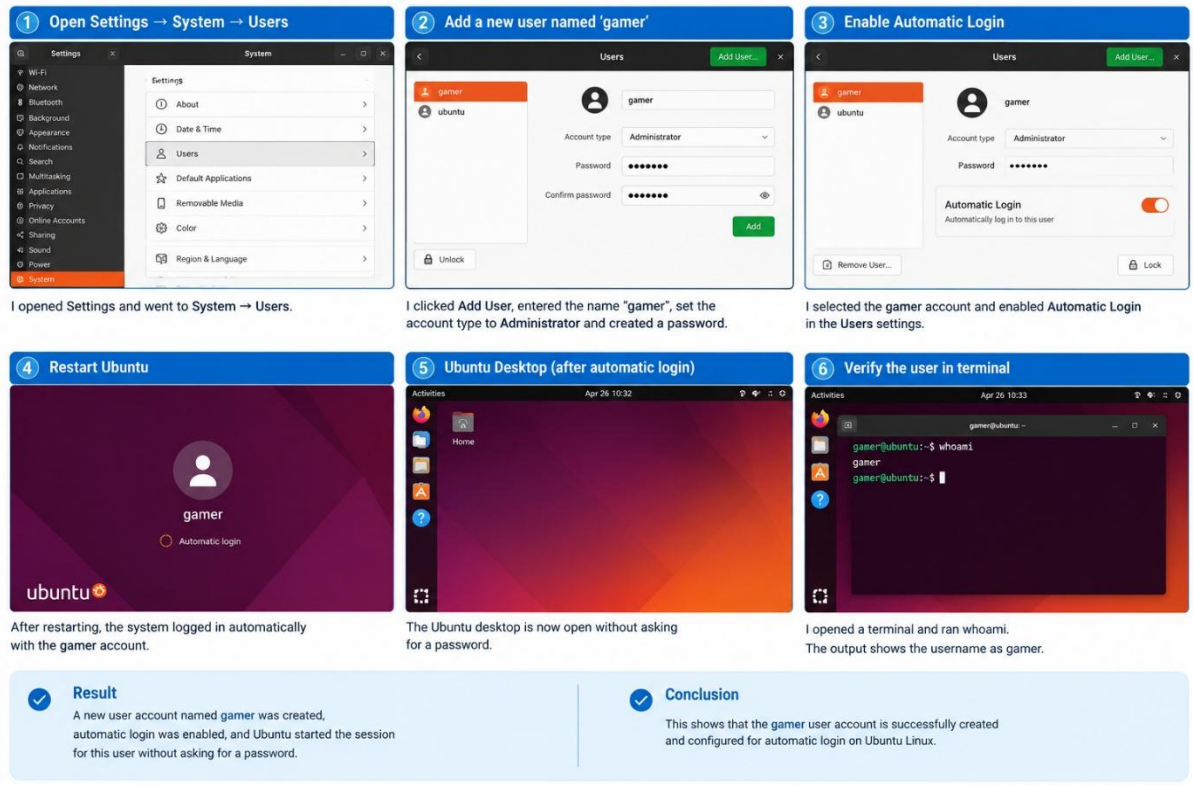

Step 5: Verify the changes

1. Follow any prompt to restart or refresh the session, if shown.
2. Reopen Language & Region to confirm your selected language.
3. Check the desktop to confirm the new wallpaper is applied.
4. Take screenshots of the wallpaper and language settings for your assignment.

Result

Result: The macOS desktop wallpaper was changed, and Hindi or Gujarati was selected as the preferred system language.

Task 4 : Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

To create a new user account named gamer and enable automatic login in Ubuntu Linux.

Procedure:

1. Opened Settings and navigated to System → Users.
2. Created a new user account named gamer.
3. Set the account type to Administrator and created a password.
4. Enabled the Automatic Login option for the gamer account.
5. Restarted Ubuntu to check the automatic login feature.
6. Verified the username using the whoami command in the terminal.

Result: The gamer user account was configured for automatic login.

Task 5 : Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing.

Practical: Installing Windows 10 on a Laptop

Aim: To learn how to install Windows 10, create disk partitions, and configure privacy and update settings.

Requirements: Laptop, Windows 10 ISO file, bootable USB drive (8 GB or larger), and backup of important files.

Procedure

Part A: Install Windows 10

1. Download the Windows 10 ISO file from the official Microsoft website.
2. Use Rufus to create a bootable USB drive.
3. Insert the USB into the laptop and restart it.
4. Open the boot menu and select the USB drive.
5. Choose the language and keyboard layout, then click Install now.
6. Accept the licence terms and select Custom Installation.
7. Select the correct disk partition for Windows and click Next.
8. Wait for the installation to finish and follow the on-screen setup instructions.

Part B: Disk Partitioning Tips

1. Back up important files before installing Windows.
2. Select the correct disk to avoid deleting personal data.
3. A partition of around 150–250 GB may be suitable for Windows and applications, depending on the total storage available.

4. Use a separate partition for personal files if required.
5. Allow Windows Setup to create the necessary system and recovery partitions automatically.

Part C: Privacy and Update Settings

1. Privacy: Open Settings → Privacy and turn off permissions you do not need, such as location or microphone access.
2. Windows Update: Open Settings → Update & Security → Windows Update and check for available updates.
3. Drivers: Install the required Wi-Fi, audio, and graphics drivers.
4. Security: Make sure antivirus protection is active and set a strong password or PIN.
5. Activation: Open Settings → Update & Security → Activation to check Windows activation status.

Important: Windows 10 standard support ended on October 14, 2025. In 2026, consider Windows 11 if your laptop supports it, or check whether you qualify for Windows 10 Extended Security Updates.

Observation

The installation process includes preparing a bootable USB, selecting disk partitions, configuring privacy settings, and checking updates and drivers.

Result

I learned the procedure for installing Windows 10, managing disk partitions, and configuring privacy and security settings.

Note: These are theoretical steps if you have not actually performed the installation.
